

**Some of our members suffer from mental/emotional disorders like depression & anxiety, which are not merely situational.**

1. We allow these members to be prescribed mild psychotropic medicines.
2. This helps them to cope with the stress of in-house recovery.
3. This helps to prevent self-medicating relapses.
4. We outsource this to doctors.

**We do not allow medicines like Suboxone, Methadone, Benzodiazepines, Adderall, Opioids, or other medicines that create euphoria.**
